- **Estimated Delivery Dates**

Shipping your items(s) on time is very important to us. For the most part, we calculate estimated delivery dates to help you find out when your order is expected to arrive. An estimated delivery date is a calculation of several factors, including;

- Availability
- Allocation in our warehouse
- The shipping method you select
- The final shipping destination

When we can accurately calculate estimated delivery dates, we'll provide them to you during checkout, as well as in your Order Confirmation email and Order History.

Please note that Estimated Delivery Dates are estimates only, and are not guaranteed.

Due to many factors, Estimated Delivery Dates, can also change between the time you place the order and receive an order confirmation. We do our best to

provide accurate estimates and provide you with several other resources for tracking the order, such as order detail and tracking links.
